

Instructions:

159011 – Twin Air Cleaning Bucket

- Insert Orange grate into the bottom of the bucket.
- Fill the Bucket with either hot water and BIO Dirt Remover or Liquid Dirt Remover.

- Place dirty filter into bucket.
- Insert the black cage into the bucket with the arms facing up. The cage will be a very tight fit. Push down on the center of the cage to install.

- Push the cage completely under your cleaning solution as to keep the filter from floating.
