

Yamaha YFZ450 Powerflow Kit Installation Instructions

Use the following instructions when installing your Yamaha YFZ450 PowerFlow Kit (#152902C):

- 1) Remove the air filter, air filter cage, and plastic sealing ring, which houses the backfire screen
- 2) Mount the TwinAir Aluminum sealing ring/flange on the airbox, in the same way the original sealing ring was mounted (Be sure to use the supplied bolts that came with the flange, coating the threads in LocTite)
- 3) Trim 1/8" off the bottom of the plastic bolt tube, which is located in the center of the stock filter cage
- 4) Once the Aluminum TwinAir PowerFlow Kit is mounted, your air filter can be re-installed
