

Sealingring Honda 450

Twin Air has developed an inner sealing ring for the 2009 Honda CRF450R. Crafted from a composite plastic material, this product is light weight and durable.

Designed to provide a better filter sealing surface, the inner sealing ring creates a pocket for the filter/cage assembly to rest in. This design also makes filter mounting easier by allowing the filter/cage assembly to mount in only one position.

Available under part number:

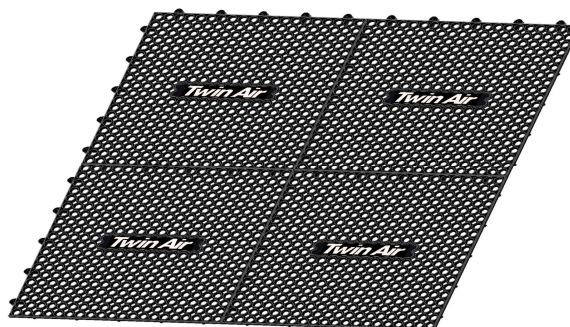

150120 Airboxintake Sealingring (Material ABS) HONDA CRF450 09/..

Twin Air Modular Floor

A new product from Twin Air that is perfect for your pit area, dealership display, or track vending booth.

Constructed from a composite PVC material, this grid floor system keeps your display area clean and professional. The grid floor system has open pores to keep dirt and water from entering your display area and also helps with fatigue by providing a soft surface to stand on.

Available under part number:

177782 Twin Air Modular Floor 1m2 (9pcs)
