

## Part Number 152917C

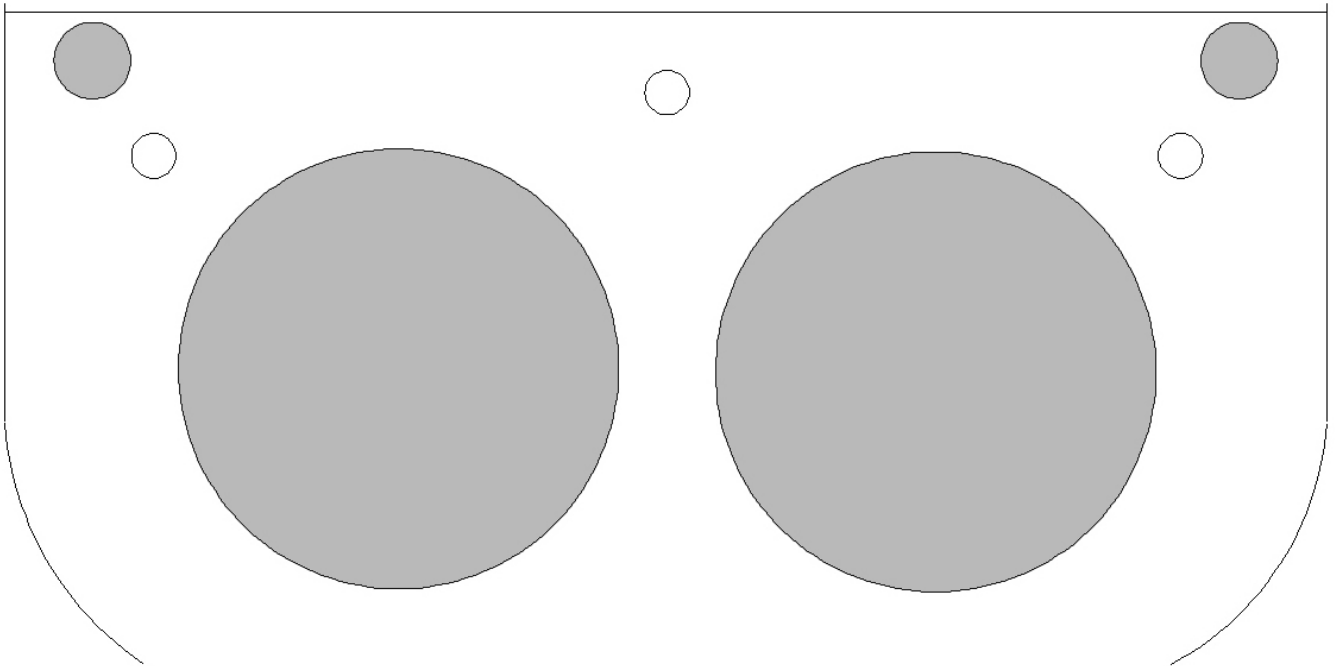

### **PowerFlow Kit Yamaha Raptor 660**

(incl. Air Filter (FR), Wire Cage, Aluminium Flange and Mounting Hardware)

#### **Instructions:**

Follow the instructions below to correctly drill 3 new mounting holes in your airbox when installing the aluminum flange. (Kit #: 152917C)

1. Cut out the template shown below, including the inner shaded areas.
2. Remove airboot from airbox, and place template over newly exposed round inlets.
3. Using a ¼" bit, drill 3 new mounting holes in the airbox where the 3 drill points indicate on the template.
4. After the new mounting holes have been drilled, place aluminum flange inside airbox and secure with the provided hardware, making sure to coat the threads of all fasteners with loctite.
