

To install the Twin Air airboxintake sealingring (part number 154.121ISR) you need to modify the original airbox intake rubber. It's only recommended to use the Twin Air airboxintake sealingring in combination with the Twin Air Powerflow Kit, part number 154.211C.

The original intake rubber is 28mm width. To install the Twin Air airboxintake sealingring you need to cut the original rubber to a width of 15mm. After cutting the original rubber you can install the Twin Air product. Please check below images.

For more details or to purchase these or other Twin Air products go to www.twinair.com, www.twinairusa.com or visit your local Twin Air Authorized Dealer.
